## Fresenius Kabi Austria

At Fresenius Kabi, we are committed to improve patient quality of life. We put medicines and technologies in the hands of people who help patients and find the best answers to the challenges they face.

Fresenius Kabi specializes in the development, manufacture and distribution of IV generic drugs, infusion therapy, biosimilars and clinical nutrition products in healthcare institutions, as well as the outpatient sector, all along our corporate philosophy “caring for life.”

Our commitment is based on an integrated management system for quality, risk, occupational safety, health, environment and energy, as well as the following five principles:

### Customer Focus:

In all our activities – from product development to manufacture until marketing, distribution and customer service – we focus on the needs and expectations of our customers to provide them with competent solutions.

### Collaboration & Integrity:

We keep our promises. Transparency, accountability, legal compliance and high ethical standards are the foundations of our actions.

### Quality:

We continuously improve our processes to meet the expectations and international requirements for pharmaceutical products.

### Efficiency & Commitment:

We operate carefully in all company areas so that we can offer sustainable and affordable products on the market.

### Environment, Energy & Social Responsibility:

As part of the society, we take responsibility for respectful and sustainable interaction with our employees, business partners and the environment. Consequently, we operate in a target-oriented manner to achieve our energy and ecological objectives.

Our success is based on a common understanding about our strategic and operational objectives. We have the required skills and the commitment to reach these objectives together.

We are committed to aligning our processes along these principles and enabling our employees to act accordingly.
